Do you have an Android or iPhone mobile device? If yes, we recommend downloading the free RainoutLine.com app from the app market/store instead of signing up for text alerts. The app gives the benefit of quickly checking the status when you need to know as opposed to alerts that are sent everytime the status is updated. Text alerts are limited to 140 characters so you might not see the whole status detail and text alerts can not play audio messages. The app does not have these limitations.
