

To add your team logo to the team flag on your team page, this is what you will need to do.

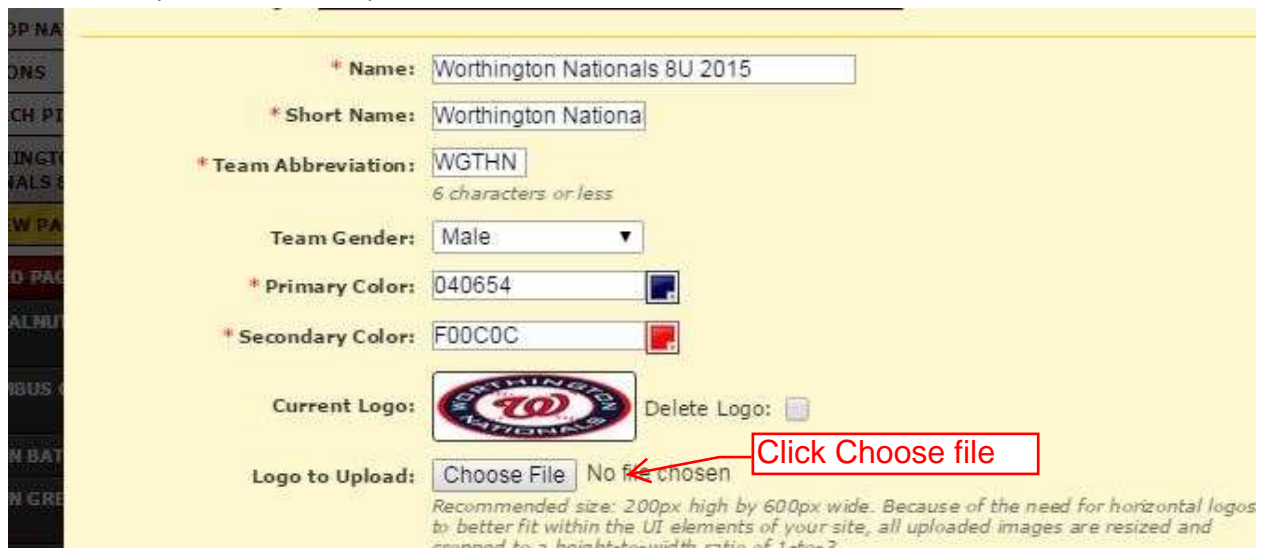

- 1.) Start with a logo in a Jpeg format.
- 2.) Using Microsoft Office or Paint programs, change the pixels to 600 Width and 200 Height to fit the flag properly. If you upload without making this change, it will work but will not fit the flag properly.
- 3.) Once you have your logo, go to your team page and then to the admin button

- 4.) Click on the admin button and select "OPTIONS" and then click on "Edit Team"

This is what you will see once you select Edit Team.

- 5.) Go to "Logo to Upload" and load your jpeg logo
- 6.) Here you can also change your primary color and secondary colors for your team
- 7.) Make sure to click on "Save team"
