

Baseball Field Measurements			
Division	Bases	Pitchers Mound	Home to 2nd
11U (Mosquito)	60 feet	44 feet	84 feet 10 1/4 inches
13U (PeeWee)	70 feet	48 feet	99 feet
15U (Bantam)	80 feet	54 feet	113 feet 2 inches
All Higher Levels	90 feet	60 feet 6 inches	127 feet 3 3/8 inches

The back of home plate is the starting point for our measurements. The back of the home plate points to the catcher and the backstop. Home plates are surrounded by a black rubber. Don't include the black rubber in your measurements, measure from the white part of the plate to the back corner of first base. This is the corner of the base closest to the foul line and furthest from second base and home. The next measurement goes from the back corner of first base to the CENTER of second base. Now measure from this point to the back corner of third base, and then back to our original point on home plate. This square will have equal sides, and 90 degree angles.
