Guest Player Affinity Process

- To add a guest player, go to the the Digital Player Card and Scoring website: http://mnyouth.sportsaffinity.com/m/pass/index.aspx?sessionguid=1c3916c9-5092-42c2-830e-7873c98428e5
- When you're on the Schedules page, find the game you're interested in adding players to.
- Once you find the specific game, you click on Home Roster or Away Roster, depending upon whether your team is home or away for that game.
- Scroll down to the Team Players section and click on Add Club Pass Player.
- Search by the players Last Name, First Name. Once the name comes up, click to add the player to the roster.
- Then, go to the roster and you can click on the player's Name or ID card to bring up the digital passes.
- Once the digital pass is open, you click to the very right of the player's name to open up a box for entering the jersey number. Then click Update. You should be done after this.

Note: Once you have added 3 guest players, you can no longer add more. Additionally, if you need to add different guest players and remove those three, you must go through an entirely different procedure (in a different website). I can explain how to do that, too, in a separate email.
