Playing Up to the next level (i.e. Little Kicker playing up to Passer level or Passer level playing up to Wing level, etc.)

- Players who are in the upper age group at a given level may wish to **PLAY UP** to the next level to play with players from the same grade or their skill level is a better fit at the next level up. Playing up to the next level is entirely **OPTIONAL** and is not recommended if the player's birthday is between 8/1 and 12/31.
- If a player's date of birth allows them to play up, **both** the level based on their age and the next higher level will be presented to you during registration for you to choose. If you are not sure which level to choose, you may not want to play up to the next higher level.
