Subject: Beacon Software acquisition of E2E Soccer Limited

Beacon Software, an AI-native technology holding company based in Toronto, today announced its acquisition of **E2E Soccer Limited**. E2E Soccer is the software backbone of competitive youth soccer in Canada, powering how leagues run their competitions and work with referees. **In 2025, E2E Soccer supported over 100 leagues, 7,500 teams, and 120,000 games across Canada.**

The acquisition will bring E2E Soccer together with PowerUp Sports to form **Canada's only full-stack soccer technology platform**. Together, these companies deliver a best-in-class experience to the soccer community, from the moment a player registers at their club to the final whistle of a league match.

Bringing E2E Soccer and PowerUp together within the Beacon portfolio will allow for an integrated experience across registration, roster verification, league scheduling, referee assignment, and discipline management. Club registrars, league administrators, and governing bodies can look forward to a streamlined and modernized experience as Beacon leverages its technology team to accelerate product development for the everyday heroes who keep Canadian soccer running.

Both E2E Soccer and PowerUp Sports will continue to operate under their current brands and leadership. As part of the Beacon ecosystem, both businesses will benefit from integrated operational support and additional investment. **Existing customer contracts, support channels, and service levels remain unchanged.**
