

# GAME SCENARIO - You Create the Play!

Successful players have the ability to find a variety of positive solutions for any given moment in the game. Solutions may include individual flare but should not be limited to technical brilliance alone as it is often the tactical decision that is key to our success.

Our visual GAME MOMENT SCENARIO series challenges player's tactical decision making as if they were in the game.

In this week's Game Scenario you create the solutions as we continue to break down concepts for attacking - WE have the ball. Please pick one of the five solutions offered in this Game Scenario and Create the Play.

Diagram Key:

Dashed Arrows = Player Movements

Direct Arrows = Pass or Ball Movements

## SCENARIO

### WE - PHASE 2>3: Creating Attacking

What choice would you make? Why is this the best option for this situation? What are your expectations for how the play will develop after delivering your pass? What expectations do you have for the defenders' movements and why? Explain any visual clues you get from the defenders' positioning or body shape.

**BLUE:** 3<sup>rd</sup> Player Combination #10 to #9

**PINK:** Dribble – commit defender, create 2v1 or surplus of players, create passing lanes, shoot

**YELLOW:** Lateral pass for possession, stretch the defense, control game tempo

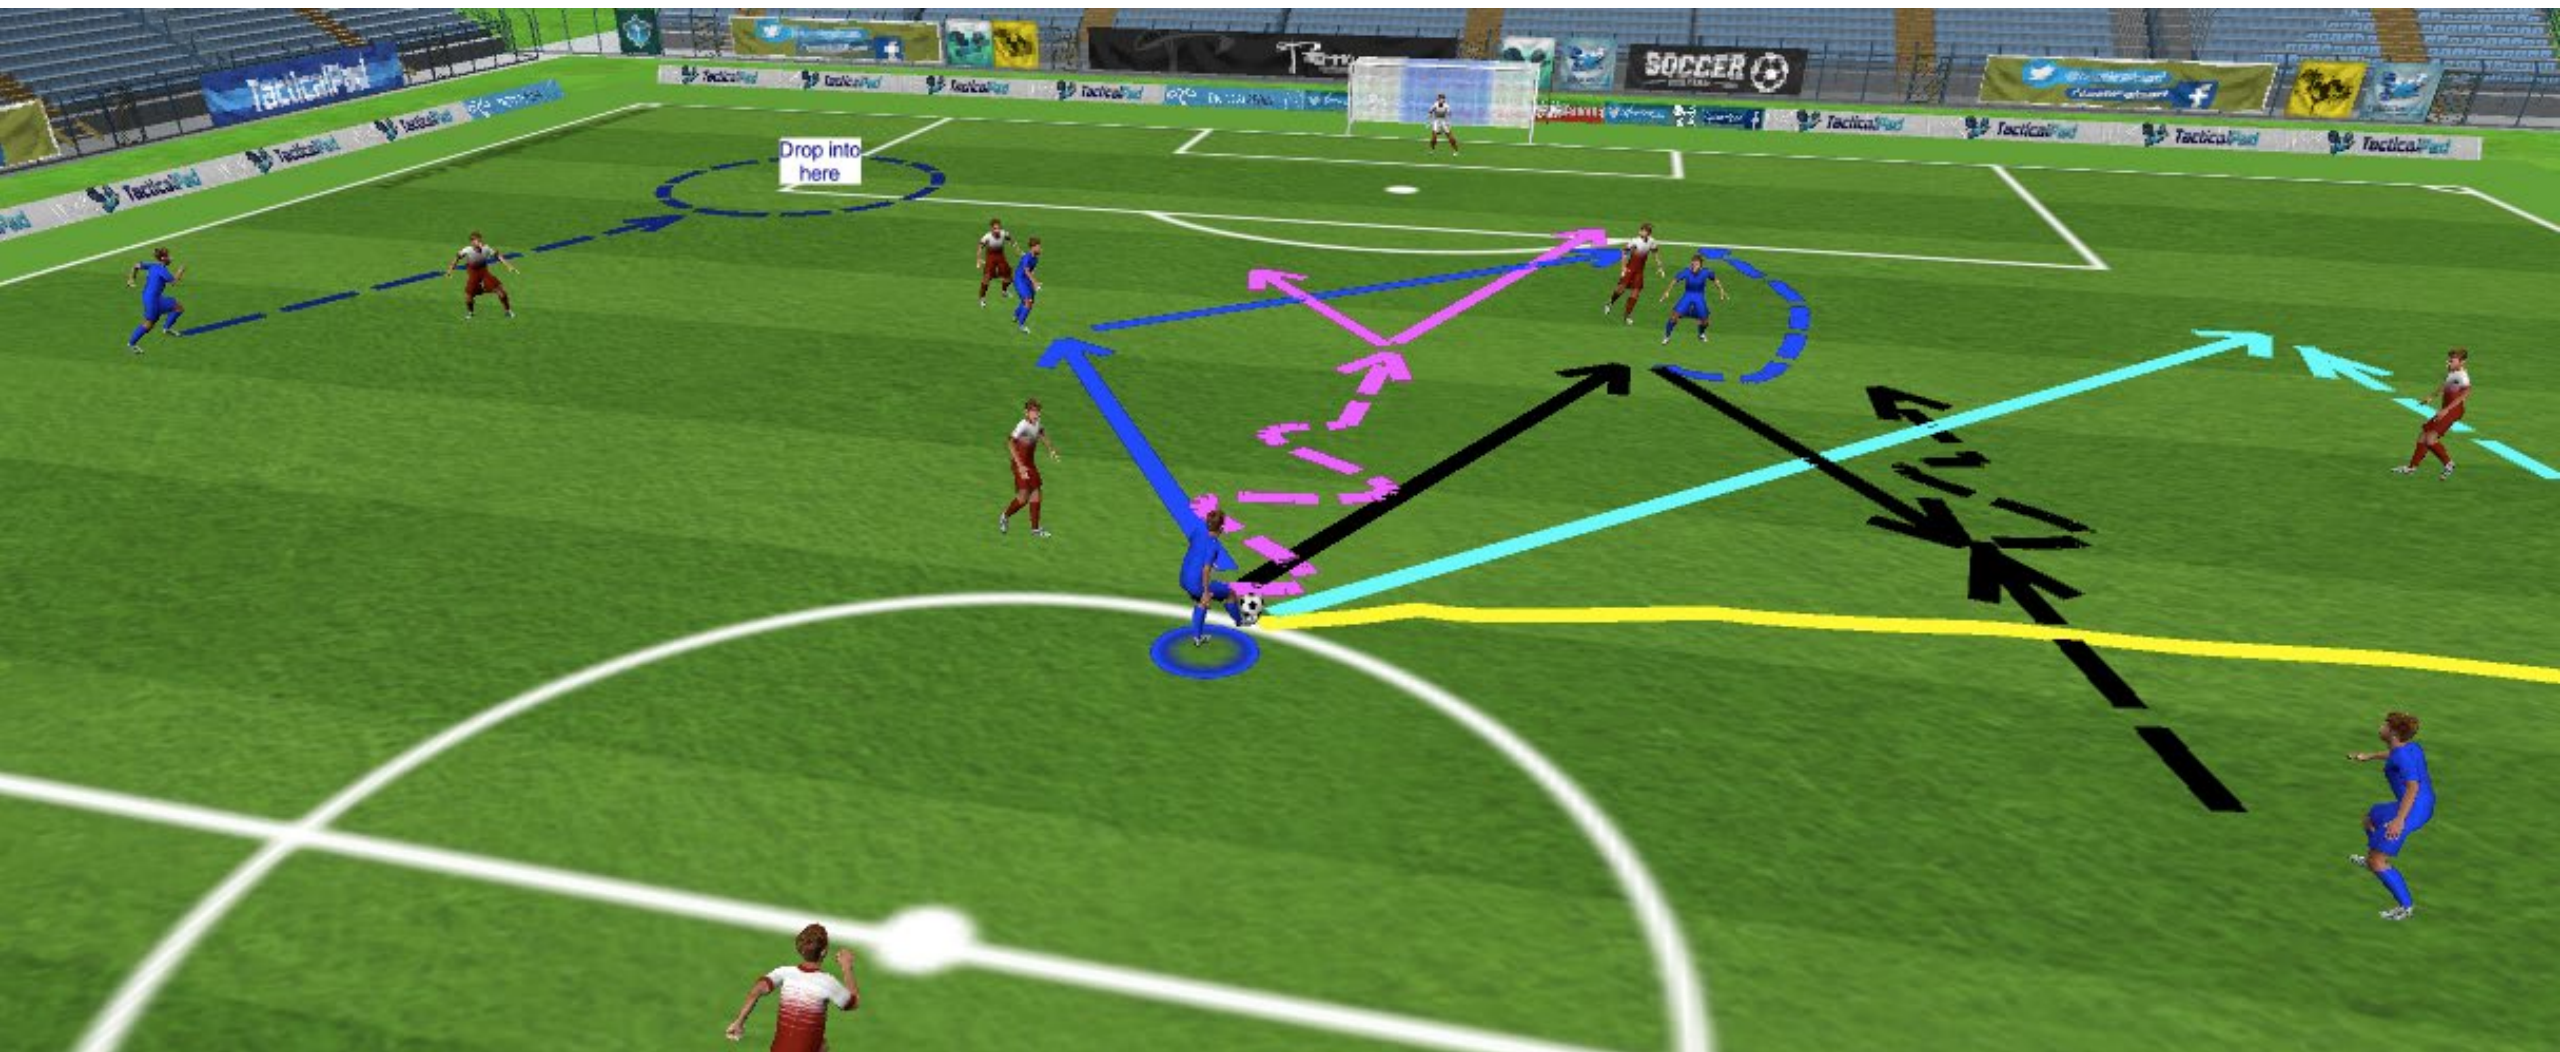

**AQUA:** Chipped or bent diagonal pass for #7

**NAVY:** Driven diagonal pass for #11 behind their back-line

## Game Scenario Analysis

<p>Which solution did you select for this week's analysis and why?</p>	
<p>Please explain why the solution you've selected offers the most productive opportunity for success in this given MOMENT. Analyze everything within the image before you explain your answer.</p>	
<p>Observing the specific details of the scenario, what do you notice about body shape of the attacking players? Are there any visual cues that offer information? Could a player be positioned differently or making a different movement other than the one offered in the diagram?</p>	
<p>Observing the specific details of the Defensive team, are they balanced and positioned well to successfully deny a goal scoring opportunity or forward play? Could they be positioned to make this a safer situation for their team?</p>
