### A TRULY MULTI-LAYERED HELMET SYSTEM

With athlete safety at it's core, the VICIS ZERO2 sets the new standard in impact mitigation, outperforming the ZERO1 in every location on both independent laboratory tests (NFL/NFLPA & Virginia Tech).\*

● **DEFORMABLE OUTER SHELL**

Flexible outer shell technology, exclusive to VICIS helmets, allows the ZERO2 to respond like no other helmet on the market. By deforming like a car bumper, impact forces are absorbed at the point of contact, before they reach the head. The result is not only groundbreaking protection, but a helmet that feels like no other.

● **REINFORCED INNER SHELL**

The inner shell has been engineered through data collected from hundreds of head shapes to optimize fit accuracy, maximize player comfort, and accommodate a wider range of players.

● **FORM LINER**

The Form Liner, which is located under the DTLA pod, provides an adjustable contour for a locked in feel in the side and occipital regions, yet can be easily removed for an extended fit range.

● **VICIS RFLX 2.0**

Optimized for the ZERO2, VICIS RFLX 2.0 continues to leverage buckling structures, but has evolved the design with an array of columns interconnected by thin, flexible walls. The result is greater impact performance at a lower weight, allowing VICIS to further tune impact performance in key locations.

● **DLTA FIT SYSTEM**

Raising the bar for personalized comfort and secure fit, the VICIS DLTA pod system is comprised of two layers: impact on the RFLX side, and comfort against the player's head. Fully interchangeable pads across 6 locations in multiple thicknesses translates to virtually unlimited customization without the need for air bladders.

**HOW TO MEASURE FOR YOUR HELMET SIZE**

Measure the player's head as shown, 1 inch above the eyebrows around the widest part of the head, using the chart below for your size guideline.

SIZE	MINIMUM CIRCUMFERENCE	MAXIMUM CIRCUMFERENCE
MEDIUM	20.25"	22"
LARGE	21.5"	23.5"
EXTRA LARGE	23"	UP
