

Mustang Season Passes are here! ...and it's all mobile this year!

6 Easy Steps to get your 2019-20 Season Passes now

- 1 Go to <https://gofan.co/MustangClub> or download Go Fan from the App Store
- 2 Register an account with your email address and create a password.
- 3 Choose a Season Pass option that's right for you, add additional passes, donate to the Mustang Club.
- 4 Provide additional pass holder information (name/email as prompted).
- 5 Check out.
- 6 Look for your email confirmation.

WHAT NEXT?

See you at the game!

Show the Go Fan "Your Tickets" email you received or open up your Go Fan mobile app for entry to regular season home sporting events.

DO NOT validate your tickets. Tickets will be validated at the gate.

Use one mobile device for the entire family or you can email a pass or passes to redeem them from a separate mobile device.

Helpful Tips...

- Register a Go Fan account first.
- Use the Events Menu to filter your view of options.
- Family Season Passes are pre-set packages with the number of family members in parentheses – families of (2), families of (3), etc. up to (6). Choose the right one for you by selecting "1" from the quantity drop down options. Immediate family members only.
- Review the Details section for information about what is included in that package or item.
- Click 'Buy Now' and it will display Your Cart and selection(s). Then click the blue bar at the bottom "Enter Additional Information" to enter required information.
- To purchase other items (additional passes or make a donation), click the back button twice to return to the main screen. Select your additional item and 'Buy Now' will take you back to Your Cart where your previous purchases should be waiting.
- If any selection is missing required information, the item in your cart will note that "This event requires additional info" - click 'Update' to complete.

For Help: Go to **Fan Support**. <https://www.huddletickets.com/fansupport>

For FAQs and trouble-shooting, look for the Fan Support link at bottom of the web page and in the app.
