Dear Seven Elite Academy,

Terra Linda Elementary has certainly appreciated the amazing contribution that Seven Elite Academy has given our school. This business partnership has extended way beyond our wildest dreams and we hope that it will continue forever in the future.

First, Matt and Hector have built amazing on-site soccer clinic for our school. The activities are engaging and involve many Utah Core Standard PE skills that the students need and love. By giving our school two weeks training each year our students have increased their soccer skills and the games at recess are greatly enriched due to the skills that Matt and Hector have taught them. We observe students playing soccer every recess and the games are more skilled and competitive.

In addition, the Academy worked hard to help us get quality soccer goals. The students have played for many years with coats as goals and with Matt and Hector's help we were able to purchase high quality soccer goals that will last for many years to come. However, the Academy did not stop there. They helped us every step of the way by building the goals when they arrived at our school and they have helped us to maintain them on our field.

When looking for a secondary evacuation site once again Seven Elite Academy stepped up to allow our school to be housed in their training facility in case of an emergency. This is just the quality impact that the people at the Academy are. They are amazing at everything they do and I highly recommend them to anyone pursuing soccer activities.

The students, teachers and staff members truly look forward to the two weeks and many other times that Matt, Hector and Seven Elite Academy have provided for our school. Their character and program have impacted our school greatly. Thank you.

Sincerely,

  
Karen Gorringe, Principal, Terra Linda Elementary
