

To access your KVHA team site, you must have a sportengine user id. If you have never registered with sportengine before, please create a new account. If you already have an account, please login.

Navigate to your team site and, if you have access to modify the page, you will see an Admin field on the left pane of your website

To modify the page, enter games, add pictures etc you must turn on edit mode. To turn on edit mode, click the “Edit Mode” button on the left side under the Admin gear. You will be in edit mode when the page turns yellow. Don’t forget to turn edit mode off when you are done editing your pages.
