Philosophy

1. FUN - hockey should be made as fun for the player as possible.
2. The kids should love to come to the rink.
3. Skating skills will be the emphasis with puck skills secondary.
4. Kids should be kept active as much as possible by dividing into small groups and running separate drills.
5. Practice ice should be run like a clinic environment. Players will be split up into groups and will work in stations with similar skill players.
