# SBT 200 is a new generation rectal suction biopsy instrument

Based upon the well-known SBT 100 with over 50 years proven effective use in obtaining rectal biopsies for the diagnosis of Hirschsprung's disease

## **SBT 200 is fully assembled Sterile Single use**

### **Features of the SBT 200**

- ❖ No extra tubing or syringes required
- ❖ 100% complete
- ❖ Pre-assembled
- ❖ Sterile
- ❖ Convenient 5 pack
- ❖ No more lost parts
- ❖ Flexible barrel design
- ❖ Ease of removing the biopsy sample from the instrument
- ❖ Measure Indicators (10mm each indicator)
- ❖ Adjustable knob to turn cutter for user preference
- ❖ Gauge supplied with clearly marked working zone indicator for consistent biopsies

### **Retaining the advantages of the SBT 100:**

- \* Small diameter capsule for easier insertion
- \* Flexible barrel for ultimate control
- \* 360-degree adjustable capsule direction
- \* Depth indicator markers
- \* Easily removable capsule for biopsy sample removal
- \* Suitable for multiple biopsies in a single procedure
- \* Proven Cutter and Capsule design you are familiar with for precision cutting
- \* Squeeze handle operation for precise operator control
