

Breakaway Youth Hockey COVID Safety Protocols

1). Gym setup: we will be utilizing both levels.

- Main Floor: will be sectioned off to provide appropriate space. Each “section” will hold no more than 2 athletes. During the workout portion of the session athletes will remain in their assigned space the whole time. This eliminates sharing equipment and moving around the gym.
- Upstairs: Shooting area. We will have 4 shooting lanes. This will provide space to have half the group. **Helmets required
- Shooting will have programmed shot patterns and reps for each session. We hope with this setup kids get way more shots each session compared to years past.
 - Coaches will be needed to pick up pucks

2). Cleaning protocols: Each session will be “clean by committee”. Disinfecting wipes and spray will be provided. Athletes, trainers and coaches will all help clean and disinfect equipment and space used.

- We (Shay or Marshall) will allow for enough time between sessions to mop floor and extra disinfecting.

ALL OYHA and OIC COVID protocol will apply during this training.

Parents must RSVP through SportEngine to enable contact tracing if needed.
