

## COVID-19 Protocol :

We have taken enhanced health and safety measures to protect our venue guests. However, there is an inherent risk of exposure to COVID-19 in any public place where people are present. COVID-19 is an extremely contagious disease that can lead to severe illness and death. According to the CDC, senior citizens and guests with underlying medical conditions are especially vulnerable. By entering the venue, you voluntarily assume all risks related to exposure to COVID-19, and Venue disclaims any and all liability related thereto.

- Skaters will need to agree to follow our appropriate social distancing “staging/get ready” areas. These areas will give participants an area to put on skates and helmets when applicable. You must also follow social distancing while on the ice and bench.
- Skaters are able to enter the building 15 minutes before their scheduled event. This will allow enough time to put on skates and helmets before entering the ice.
- After each session, all participants will have 15 minutes to leave Comm Ice. This will allow staff to clean and the next session to arrive 15 minutes before their session. No loitering.
- Each guest that enters our facility will need to sign in and provide contact information for documentation purposes.
- **Each skater is allowed one spectator to be at the rink with them.**
- Participants need to come dressed and ready to their fullest capability prior to entering the rink. ALL locker rooms will remain closed during this time period. Customers must wait in their cars until the start of their ice time. Bags are allowed inside the facility.
- You must wear a mask while in the building. The skater can remove theirs once they are ready to get on the ice.
- You must bring your own water bottle with no sharing. Water Fountains are not available.
- Handshake lines are not permitted.

## IF SOMEONE TESTS POSITIVE...

If an individual thinks or knows they had symptomatic COVID-19, CDC recommends home isolation until they meet the following criteria:

- 3 days with no fever
- Respiratory symptoms have improved
- 10 days since symptoms first appeared.

If the individual will be tested, they can be around others when:

- they have no fever
- respiratory symptoms have improved
- they receive two negative test results in a row, at least 24 hours apart.

If the individual tested positive but had no symptoms, CDC recommends home isolation for 10 days after the test.
